aanya987.vercel.app | Delhi, India

Languages:	Python, Java, SQL, C++
AI/ML:	Machine Learning, Deep Learning, NLP, Generative AI, LLMs, Prompt Engineering
Agentic AI:	LangGraph, LangChain, RAG, AI Agents, Vector Databases, AI Automation
Data Science:	NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, EDA, Data Visualization
Frameworks:	FastAPI, Flask, Streamlit, TensorFlow, Keras
Databases:	MySQL, PostgreSQL, MongoDB, SQLite, Redis
AI Tools:	ChatGPT, Claude, Gemini, GitHub Copilot, Cursor, Groq
Developer Tools:	Git, GitHub, VS Code, Jupyter Notebook, Postman, Docker

Experience

AI Developer Intern <i>Infosys Springboard</i>	Nov 2025 – Jan 2026 <i>Remote</i>
- Built and deployed an AI-based Transfer/Query application using Python, TensorFlow, and PyTorch, automating 500+ user interactions. - Fine-tuned NLP and LLM models for intent classification across multi-turn dialogue using Hugging Face and prompt engineering.	
AI Automation & Intelligent Solutions Intern <i>IBM SkillsBuild – AICTE & BharatCares</i>	Jun 2026 – Jul 2026 <i>Virtual</i>
- Gained hands-on expertise in Agentic AI, workflow orchestration, and intelligent automation via project-based master-classes. - Integrated AI models, REST APIs, and digital tools to build automated, intelligent end-to-end solutions.	

Education

B.Tech. – CSE (Data Science), SRM Institute of Science and Technology (SRM IST)	2023–2027	8.5 CGPA
Senior Secondary Education – CBSE, Guru Harkrishan Public School, Delhi	2022–2023	71.2%
Secondary Education – CBSE, Victor Public School, Delhi	2020–2021	85.6%

Projects

Walmart Sales Forecasting & Pricing https://github.com/Aanya987/walmart-sales-forecasting-pricing
- Built a Random Forest regression model in Python to forecast Walmart weekly sales across 45 stores, achieving 4.85% MAPE and outperforming baselines by 30%. - Engineered features from holiday, weather, and pricing data; deployed a dynamic pricing and stock recommendation dashboard using Streamlit
MediRun – Medical Equipment Delivery https://github.com/Aanya987/medirun-sault
- Built India’s first on-demand medical equipment delivery platform using Next.js, TypeScript, and Tailwind CSS for real-time wheelchair, nebulizer, and oxygen cylinder delivery. - Developed a full-stack SaaS web app with secure authentication and responsive UI; deployed on Vercel across 3 production releases.
SmartForm – Dynamic User Registration Platform https://github.com/Aanya987/registration-form
- Built a full-stack registration platform using Python, SQL, and the Anvil framework with a structured schema for secure data storage. - Implemented a JavaScript-driven responsive UI with custom theming for real-time, cross-device form handling.

Achievements & Certifications

Smart India Hackathon (SIH) 2025: Finalist, contributing to an innovative national-level tech solution. Geek Tank: Secured 3rd Position in a competition on entrepreneurship and startup ideation. Creative Lead, ISTE (Indian Society for Technical Education), SRM IST, 2024 – 2026. Certifications: SAP S/4HANA (GBI 3.30) – SAP University Alliances; Data Analyst – Deloitte Australia; AI Primer & Computer Vision 101 – Infosys Springboard.
